Experience

CoinDCX

Bengaluru

Software Engineer

Sep 2024 – Present

- Delivered key Growth features with zero bugs which increased orders by **17%** and volume by **12%**
- Reduced the app size by **26%** which decreased the download time by **2.3s**
- Improved app stability by **31%** by identifying and fixing non-fatals, crashes and ANRs.

Atoa

London, UK

SDE - App Lead

Oct 2022 – Sep 2024

- Built the peer-to-peer payments app from the ground up
- Built payment integrations with accounting SaaS like QuickBooks, Xero & Sage (Full Stack)
- Played a key role in establishing Flutter test suit (Unit, Widget and Integration Tests)

Steam-A

Coimbatore

Mobile Developer

Jul 2021 – Sep 2022

- Built the vendor application (web & app) for home chefs to list food and take orders
- Integrated Stripe payment gateway with Google Pay, Apple Pay and Cards for streamlining checkouts

Projects

Cato TV | Flutter, GraphQL

- Built a TikTok-style short-form video app delivering bite-sized educational content through a vertical scrolling feed.
- Contributed to an open-source collaborative codebase, coordinating with external contributors across features, code reviews, and releases.

Payment SDK | Flutter, Dart

- Built the official SDK for Atoa, enabling merchants to integrate Open Banking payments across iOS & Android with a single API call.
- Maintained with full test coverage, CI/CD pipelines, and published documentation

Regal - Design System | Flutter, Dart

- A centralised component library to maintain the consistency across multiple apps
- Regal has many utils which makes building UIs effortless
- Themes are handled out of the box
